As a point of clarification, the Election/Restriction requirement mailed on 7/28/2005 has been withdrawn in favor of the instant Election/Restriction requirement.

## Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I: Claims 1-45, drawn to a container having a layer of elastomeric material to hermetically seal a product therein and to provide an elastomeric formation operative to engage an upper surface of the product or a container having a facility for providing internal pressure relief, classified in Class 206 and others, subclass 440 and others.

Group II: Claims 46-63, drawn to a method and an apparatus (claims 46-58) of manufacturing a haemostatic bandage, classified in Class 164, subclass 1, 139 and others.

The inventions are distinct, each from the other because of the following reasons:

Inventions [II] and [I] are related as process/apparatus of making and product. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by providing the container without an elastomeric formation operative or without first, static, seal and a second, dynamic, seal or without a facility.

Application/Control Number: 10/612,766 Page 3

Art Unit: 3728

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan K. Bui whose telephone number is (571) 272-4552.
